See Dosing in Renal Impairment for Amoxil 500 mg cost recommendations in patients with renal impairment. Interstitial nephritis resulting in oliguric renal failure has been reported in a small Amoxil 500 mg cost of patients after overdose with amoxicillin<sup>1</sup>. Crystalluria, in some cases leading to renal failure, has also been reported after amoxicillin overdose in adult and pediatric patients. In case of overdose, adequate fluid intake and diuresis should be maintained to reduce the risk of amoxicillin crystalluria. High blood levels may occur more readily in patients with impaired renal function because of decreased renal clearance of amoxicillin.

Amoxicillin may be removed from circulation by hemodialysis.
