Rating 4.6 stars, based on 220 comments

Glucophage (Metformin) ★★★★★

BUY NOW

Short description

Glucophage is a first-choice medicine indicated for the management of high blood sugar levels in patients with type 2 diabetes mellitus (non-insulin-dependent diabetes) along with an exercise and diet regimen. The medication may be used in the treatment of elevated insulin levels observed in women with polycystic ovary syndrome (PCOS). The drug is also helpful in the management of type 1 diabetes mellitus (insulin-dependent diabetes) where the symptoms are poorly controlled with insulin alone. Glucophage tablets are beneficial for use in patients over 10 years of age. [Read more](#)
